NGDA Lifecycle Maturity Assessment (LMA) Report

Time Frame:
Activities from 2009-2015

LMA Submission:
Status: Complete
Date: 9/29/2015
Extension Requested: No

LMA Reviewer(s):
Supervisor: Kevin Cutress
Theme Lead: Raquel.Hunt@dot.gov
Executive Champion: richard.mckinney@dot.gov
SAOGI*: richard.mckinney@dot.gov
Other: Steve.Lewis@dot.gov

LMA Verifier:
Name: Raquel Hunt
Email: Raquel.Hunt@dot.gov

Attachments:
To get access to any attachments referenced in the report, email the LMA Help Desk at NGDA_LMA_help@fgdc.gov. Please use the subject "Dataset Report Attachment(s)" and indicate the associated official NGDA title.

*Senior Agency Official for Geospatial Information (SAOGI)
Lifecycle Maturity Assessment (LMA) Summary

Overall Maturity:

<table>
<thead>
<tr>
<th>Maturity</th>
<th>General Questions:</th>
<th>Stage 1 - Define/Plan:</th>
<th>Stage 2 - Inventory/Evaluate:</th>
<th>Stage 3 - Obtain:</th>
<th>Stage 4 - Access:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mature; Consistent</td>
<td>8%</td>
<td>75%</td>
<td>100%</td>
<td>100%</td>
<td>100%</td>
</tr>
<tr>
<td>No Activity</td>
<td></td>
<td></td>

NGDA Dataset Maturity Definitions:

How To Calculate Maturity: [https://www.geoplatform.gov/sites/default/files/How_to_Calculate_Maturity.pdf](https://www.geoplatform.gov/sites/default/files/How_to_Calculate_Maturity.pdf)

<table>
<thead>
<tr>
<th>Maturity</th>
<th>Maturity Characteristics for All Lifecycle Stages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Optimized; Established</td>
<td>Dataset meets virtually all business needs of all users. The dataset is considered authoritative by owners and secondary users. It is curated across all stages of the approved lifecycle. Future needs are defined on a regular basis and resources for addressing both current and future business requirements are available.</td>
</tr>
<tr>
<td>Mature; Consistent</td>
<td>Dataset meets all the business needs of the primary owner and most of the secondary users. The dataset is curated and used as authoritative by the primary owner. Dataset is used widely by secondary users actively engaged in sustaining the dataset. Future needs are identified and steps are planned to address these. All stages are supported and reviewed on a recurring basis. The dataset is well managed in relation to the approved lifecycle.</td>
</tr>
<tr>
<td>Managed; Predictable</td>
<td>Dataset meets a significant number of the business needs of the primary owner and is widely used as an authoritative resource by secondary users. Benchmark activities are occurring in at least four of the approved lifecycle stages. Management practices in relation to the approved lifecycle is moderate but consistent. Dataset is integrating changing business requirements in lifecycle stages impacting overall maturity.</td>
</tr>
<tr>
<td>Transition; Transformation</td>
<td>Dataset meets business needs of the primary owner and has moderate use by secondary users. Benchmark activities are occurring in at least three stages. Efforts to integrate funding, include partners, and obtain data are not supported in a sustained manner. Management practices in relation to the stages of the approved lifecycle is limited.</td>
</tr>
<tr>
<td>Planned; Initial Development</td>
<td>Dataset limited in meeting business needs of the primary owner. Benchmark activities in the approved lifecycle are just starting to consider secondary uses, partnerships are forming to support additional dataset uses. Dataset development is in a very early stage. Minimal or limited management against the benchmarks in the approved lifecycle.</td>
</tr>
<tr>
<td>No Activity</td>
<td>Dataset meets project or local business needs of the primary owner, secondary or additional uses or users were not considered, not recognized as an authoritative data or is part of a similar dataset. Not managed to any of the benchmarks in the approved lifecycle.</td>
</tr>
</tbody>
</table>

Created: 2015/12/31
General Questions for All Stages

1) Is there a recurring process to obtain funding for all lifecycle stages of this dataset?

Answer: Funding is from local offices, budgeting effort minimal, staffing minimal.

Justification Comment: Data set was developed to support the Waterborne Commerce Statistics Center (WCSC) mission which is authorized by Rivers & Harbors Act of 1922. http://www.navigationdatacenter.us/wcsc/wcscmiss.htm

Continued maintenance is essential to accomplishing the WCSC mission and ongoing maintenance and updates will be performed as part of that mission.

2) Is there a process in place to ensure that open government and transparency guidelines are followed in all lifecycle stages for this dataset?

Answer: No.

Justification Comment: Dataset was developed with input from several federal agencies and industry in conjunction with the Federal/Industry Logistics Standardization (FILS) committee. It is used by WCSC, other U. S. Army Corps of Engineers offices, and other government agencies and the public. Location codes have been adopted by the U. S. Coast Guard as the unique identifier for destinations in AIS messages and that requirement has been published in the Federal Register.

Ports data is available at:
- Annually on the National Transportation Atlas Database (NTAD)
- Data.gov
- CorpsMap http://maps.crrel.usace.army.mil:7778/apex/cm2.cm2.map?map=UOC
- NDC website http://www.navigationdatacenter.us/db/gisviewer/
- NDC website http://www.navigationdatacenter.us/ports/ports.htm

3) Are there processes and tools in place so that staff are sufficiently knowledgeable to ensure a continuity of the dataset for all stages of the lifecycle, especially during staffing transitions?

Answer: No.

Justification Comment: Several members of WCSC staff are familiar with the dataset and can train new staff as needed. Standard Operating Procedures have been defined and implemented. We are in the maintenance and use life cycle steps. Nothing has been developed for the archiving and disposal step.

STAGE 1 - Define/Plan

4) Are user and business requirements defined and formalized?

Answer: Ad hoc process is used for involving Partners/stakeholders in identifying requirements.

Justification Comment: Over time, WCSC has made ports facility dataset available to public in a variety of formats….ASCII, shapefiles, and KMZ/KML files.

5) How are partners/stakeholders involved in the requirements collection process?

Answer: A recurring process is in place, including defining new partner and stakeholder business
needs as they arise, and is fully implemented.

**Justification Comment:** Requirements were defined through the Federal/Industry Logistics Standardization (FILS) process. Requirements were identified in meetings between industry and government agencies. Ongoing FILS meetings are used to identify new or modified requirements.

6) Is there a quality assurance process for the dataset?

**Answer:** Process identified, early implementation.

**Justification Comment:** Location and other attributes are validated through interaction with industry users of the data. GIS tools are also used to enhance the quality of the dataset. Survey process is under development to regularly update info for facility owners/operators.

7) Is there a process to evaluate the sensitivity, privacy, and confidentiality of this dataset?

**Answer:** Sensitivity, privacy, and confidentiality evaluations fully implemented, reviewed and updated on a recurring basis.

**Justification Comment:** Data is unclassified and is available to the public. Some data is personally identifiable information or trade secrets. Those attributes in the data have been identified and are not released to the public.

8) Are defined data standards used in collecting, processing, and/or rendering the data?

**Answer:** Standards being implemented.

**Justification Comment:** Some standards for accuracy and data formats were defined and implemented as part of the initial development process. Timelines and collection method standards will be developed as part of the survey process.

9) Is there a process for determining if data necessary to meet requirements already exist from other sources (either within or outside the agency) before collecting or acquiring new data?

**Answer:** Process for determining appropriate data is being reused fully implemented, reviewed, and updated on a regular basis.

**Justification Comment:** It was determined that no other data source meets all Corps and other agency requirements. The data available from other data sources is used as a quality control check on the data we collect.

10) Is there a process for obtaining data in relation to this dataset?

**Answer:** Process is fully implemented, reviewed and updated on a regular basis.

**Justification Comment:** Industry publications are reviewed for info on new, upgraded, or closed facilities. When new facilities appear as origins or destinations of commodity movements on Vessel Operation Reports, a process is in for adding those facilities to the dataset.

11) Is the metadata in a FGDC endorsed geospatial metadata standard?

**Answer:** Metadata is available in a format endorsed by the FGDC, it fully describes the dataset and provides all the information required to make the dataset discoverable, accessible, and usable.

**Justification Comment:** Metadata is available in a format endorsed by the FGDC, it fully describes the dataset and provides all the information required to make the dataset discoverable, accessible, and usable.
Metadata is available in FGDC and ISO format. ISO format is available through the dataset when viewing using ArcCatalog, and FGDC is available through data.gov (https://catalog.data.gov/dataset/navigable-waterway-routes-national-national-geospatial-data-asset-ngda-waterway-lines).

12) How complete is the geographic coverage as defined in the requirements for the dataset?

**Part 1 Answer:** Business requirements for cyclic updates identified and a process is in place.

**Part 2 Answer:** Dataset has presently attained the greatest geographic coverage as defined by the current requirements or roughly 100%.

**Justification Comment:**
The Navigation Data Center maintains a database -over 40,000 port-and-waterway facilities and other navigation points of interest. The data describe the physical and inter-modal (infrastructure) characteristics of the coastal, Great Lakes, and inland ports of the United States. Data are also included for facilities in Alaska, Hawaii, Puerto Rico, the U.S. Virgin Islands, and the trust territories of the Pacific. The data include, but are not limited to location (latitude/longitude, waterway, mile, and bank); operations (name, owner, operator, purpose, handling equipment, rates, and details of open-and-covered storage facilities); type and dimension of construction (length of berthing space for vessels and/or barges, depth, apron width, deck elevation, and details of rail-and-highway access); and utilities available (water, electricity, and fire protection).

---

**STAGE 4 - Access**

13) Do you have a process for providing users access to the data in an open digital machine readable format?

**Answer:** User access process is fully implemented, data is available, process is reviewed and updated on a recurring basis.

**Justification Comment:**
The Shapefiles are available to public for download. Dataset is available through the web or on DVD. Access to the data can be achieved through any of the websites:
- Data.gov (https://catalog.data.gov/organization/fc5cb2c1-d0b0-482a-8a52-7d42ea186ae1?metadata_type=geospatial)
- Additional Shapefile source (http://www.navigationdatacenter.us/db/gisviewer/)
- http://maps.crrel.usace.army.mil:7778/apex/cm2.cm2.map?map=UOC

---

**STAGE 5 - Maintain**

14) Is there a maintenance process for updating and storing the dataset?

**Answer:** Dataset maintenance process is identified and documented.

**Justification Comment:**
SOPs have been developed and are used.

15) Is there an error correction process as part of dataset maintenance?

**Answer:** Error correction process established.

**Justification Comment:**

---

**Created: 2015/12/31**
Any feedback from external users or within agency, which result in changes to Shape points, mile points, channel depth, river name, and other features in dataset. The updated dataset published onto website.

**STAGE 6 - Use/Evaluate**

16) Is there a process to determine if the dataset meets user needs?

**Answer:** Process is complete and being implemented on ad hoc basis.

**Justification Comment:**

The users are encouraged to contact WCSC to provide feedback as they have it. We also receive regular feedback through FILS.

17) Is there a process to provide users information on how to access and properly use the dataset?

**Answer:** Process implementation started for access and proper use.

**Justification Comment:**

Metadata on how to use the dataset is available on data.gov (https://catalog.data.gov/organization/fc5cb2c1-d0b0-482a-8a52-7d42ea186ae1?metadata_type=geospatial)
The data is also available through the National Transportation Atlas Database (NTAD) (http://www.rita.dot.gov/bts/sites/rita.dot.gov.bts/files/publications/national_transportation_atlas_database/index.html), which also provides additional “how to” information.

A press release for NTAD goes out in mid-July signifying the new release of that year’s NTAD, and mentions various data layers. However no formal process is in place to explicitly communicate with users as to how to obtain this specific dataset.

18) Are the business processes and management practices assessed to meet changing technology?

**Answer:** Assessment process is fully implemented for taking advantage of changing technology, process is reviewed on a recurring basis.

**Justification Comment:**

Done as part of regular reviews of the Center’s performance and ability to meet current and evolving needs.

**STAGE 7 - Archive**

19) Is there an archiving process for the dataset?

**Answer:** Archival and disposition processes are fully implemented.

**Justification Comment:**

We create annual Data CD/DVD for in-house users and for other federal/state agencies (which can be kept in house as an archived copy).
The data has a schedule with the National Archives and Records Administration (NARA) through the National Transportation Atlas Database (NTAD) (http://www.rita.dot.gov/bts/sites/rita.dot.gov.bts/files/publications/national_transportation_atlas_database/index.html)
